

Helping Organizations

Swim ... **FASTER**

Sometimes projects just can't wait.

Initiatives such as a new product implementation designed to generate immediate new growth, a more effective customer service operation to portray a turn-around image to your customers, or a technology triage to mend mission-critical processes, cannot wait for a key role to be filled.

Business waits for no one.

So when a key management role is temporarily vacant, assistance may be needed to help bridge the gap.

Ever feel like you've got the weight of the world on your shoulders?

For situations like these Premis has developed several key specialties to assist organizations:

-  **Performance Assessment**
-  **Major Project Reviews**
-  **Management of IT Organizations**
-  **Advisory Services**

Premis management professionals are ready and able take on assignments as needed to help get essential processes back on track through our executive approach to staff augmentation.

Our management experience extends from IT operational management (help desk, deskside support, network, application development, etc.), capacity planning, purchasing and provisioning, to executive level management.

We're good swimmers, but we're even better divers!

We team with client personnel to make things happen now while concurrently designing and implementing a successful long-term solution.

Premis Consulting Group is an independent executive consulting firm specializing in IT performance improvement and best practice management, from strategy through implementation.

We are former CIOs, Consulting Program Managers, and IT Research Directors who have, as both clients and vendors, designed, managed and evaluated large organizations and engagements. These wide ranging experiences have given us insight into what works and what doesn't.

PREMIS: Results Beyond Recommendations.

*Whether you are in the process of implementing new technology, need management assistance, or are just looking for industry insight, **Premis Consulting Group** can help.*

As a leading management consultancy that focuses on IT, we specialize in improving IT organizations - from providing an independent assessment of a large project to supplying a seasoned IT management team to step into key operational roles within your organization.

PREMIS: Delivering tools you can use each day, every day.

The Premis Suite of Services Include ...

Project & Process Reviews

RFP Development

ERP Sourcing Services

Management Consulting

IT Assessments & Strategic Planning

Sourcing Advisory Services

Performance Assessment

Premis uses the Balanced Scorecard measurement system as a basis of its performance assessment method that enables managers to make better decisions by providing a comprehensive picture of performance. We identify and align key performance indicators (KPIs) & metrics with your business strategy. We utilize a comprehensive set of models, tools, and methodologies to capture, interpret, compare, and analyze data—both quantitatively and qualitatively. Our goal is to help businesses optimize operational performance and meet strategic goals.

Major Project Reviews

Large, strategic projects can often benefit from a regular review by an objective source to make sure that it is still in line with the business objectives and will continue to deliver a return on investment. Our experienced project staff begins by reviewing the overall business objectives and benefits expected in what timeframes. We review the project plan and budget, technical solution and measure the organization's readiness for the change. By developing a fact-based foundation, **Premis** then delivers our findings, recommendations, and risk mitigation strategy to enable realistic budget discussions and effective decision-making

Management of IT Organizations "Rent-A-CIO"

Because of our experience as CIOs and other senior level roles within an IT organization, **Premis** Consulting offers a unique management service that quickly affects change in your organization. We can step into key management roles in your organization to assess the effectiveness of the organization or project, establish a plan for improvement AND execute that plan. Included in the deliverable is the establishment of quality methods, processes, procedures, measurements and an ongoing governance plan. We leave you with a strong IT organization, a successful project, and a replacement for the **Premis** management team when you're ready.

Advisory Services

Sometimes what is needed is smaller than a breadbox. Because of our experience working with vendors and our contacts with other CIOs, we are privy to information that may be helpful when you're in the midst of solving a problem or making a decision. For those situations, we are available on an as-needed basis.

We provide our clients with fresh insight into market trends and economics. We help clients navigate political minefields and work through issues to successful outcomes. Our end goal? Making our clients successful. Think of it as "just-in-time" consulting.
